

How much time will it take me to work my business?

Perhaps you see, and even agree, that this COULD be done in a way that SERVES your audience rather than asks something OF THEM (it can) and you're starting to get a little excited! But you're a busy person! You don't have even one more second! Where would you find the TIME!?

Do you have 2-3 hours a week? If so, we can help you make a beginning that we don't think you'd regret.

When I began my health journey, I just had my third baby and COVID had just shut our world down so I suddenly had to learn how to do distance learning with my 2 boys while caring for a 3-month-old baby! I had more on my plate than EVER and certainly wasn't looking to add one more thing BUT what I found was that if my job as a stay-at-home-mom was a jar of large rocks, filled to the brim, and my Plexus biz became the sand that found its way around them. If I could get my products for free and make a couple of thousand dollars extra income by a few hours a week sharing about something that was helping me WHENEVER IT FIT INTO MY DAY, I wondered what else this could do for my family!?

As I shared, we have simple systems in place that can help you start making a phenomenal extra stream of income in just 2-3 hours a week. That's exactly what happened to Jill! She started the products in December and had amazing results by February. Everyone was asking her what she was doing, and in her first-month of sharing, she made over \$2,000 just word of mouth! She is now a Ruby, with an average annual income of about \$32,000/year, and has built this around her kids' schedules in just 3-5 hours a week! Watch her story on the page.
